### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 28, line 10, the term "the current-controlled logic" has been changed back to "current-controlled CMOS logic" as submitted in the amendment filed on March 10, 2004.

2. The following is an examiner's statement of reasons for allowance: A phase-locked loop (PLL) comprising a phase/frequency detector, a transconductance cell, a low pass filter or loop filter, a voltage controlled oscillator, and a frequency divider is well known in the art. However, none of the prior art shows or suggests the combination of the PLL that the phase/frequency detector, the transconductance cell, the low pass filter or loop filter, the voltage controlled oscillator, and the frequency divider are differential phase/frequency detector, differential transconductance cell, differential low pass filter or loop filter, differential voltage controlled oscillator, and differential frequency divider and each of the circuit elements within the PLL receiving differential inputs and providing differential outputs.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
